

China Research Center of Public Policy (CRCPP), China Society of Economic Reform (CSER) is a prominent government think-tank affiliated to the National Development and Reform Commission (NDRC) and is registered with Ministry of Civil Affairs. The CSER was established in February 1983 with the approval of the State Council and has more than 120 group members across China.

CRCPP is a core center of CSER and was established in 2004. Through directly supporting policy formulation and implementation of Chinese ministries, the CRCPP has successfully rejuvenated international know-how and secured international community's support in the public policy planning process. The CRCPP has been recognized as one of the prominent government think-tanks capable of providing innovative policy solutions to initiate sector based low carbon transformation in China.

The mission of CRCPP is to promote social objective driven prosperity through public and private partnerships (PPP) by optimizing the synergy among government, academics, NGOs and businesses, with the aim of pooling collective wisdom and knowledge to deliver value added policy outputs that are win-win in the resource constrained society. CRCPP's areas of work are concentrated on the five strategic pillars: governance, economic reform, infrastructure development, climate change and energy, and public service. CRCPP carries out government commissioned and international donor sponsored research projects surrounding the five pillars and have mobilized more than 300 top Chinese scholars and policy makers in multidisciplinary areas to provide cutting edge policy solutions. CRCPP also tries to ensure the sustained impact resulted from policy reform.
